Four-channel Variable stiffness Servo Actuator Simulation loading system

MD-P00421 · md-four-channel-variable-stiffness-servo-actuator-simulation-loading-system

It is applied to the missile control system to simulate the loading of the steering gear, without generating excess force.

TECHNICAL SPECIFICATIONS

Loading torque	100Nm
Maximum swing angle	40
Output torque accuracy	1%
Dynamic characteristics	frequency bandwidth 20Hz

CERTIFICATION

Certification status is confirmed per order and is not published in the catalogue listing. Request the current declaration, test reports or conformity certificates from our sourcing team.

ORDERING INFORMATION

Model	Four-channel Variable stiffness Servo Actuator Simulation loading system
Part number	MD-P00421
Lead time	30 days
Minimum order	1 unit
Supply	made_to_order

Generated from the UAVSale product catalogue. Figures are manufacturer-supplied and subject to configuration. For the current revision and full documentation set, contact our sourcing team.
