High Speed Target Drone SNT-150 （Basic type）

MD-P00430 · md-high-speed-target-drone-snt-150-basic-type

SNT-150 is a medium-speed target aircraft, which takes into account the training and equipment testing of the navy, army, and air force. It has the functions of one-button electric start of the engine, pre-planning of routes, re-planning routes and online switching of routes, and supports one-stop m

TECHNICAL SPECIFICATIONS

Captain	2.9m
Wingspan	1.4m
Take-off weight	80kg
Take-off method	land-assisted take-off/ship-borne assisted take-off
Recovery method	Land parachute recovery
Maximum level flight speed	≤160m/s
Maximum flying altitude	≤9000m (altitude)
Endurance	≤60min
Measurement and control radius	≤150km
Formation capacity	≤16 aircraft at one station, distance between aircrafts>30m
Formation style	group formation, high-density formation, continuous multiple targets, simultaneous arrival in multiple directions
Load weight	≤6kg
Load type	tracer tube, lumber ball, etc.
RCS characteristics	0.1m2~3m2 (adjustable)
Motorized overload	≤3g

CERTIFICATION

Certification status is confirmed per order and is not published in the catalogue listing. Request the current declaration, test reports or conformity certificates from our sourcing team.

ORDERING INFORMATION

Model	High Speed Target Drone SNT-150 （Basic type）
Part number	MD-P00430
Lead time	30 days

Minimum order	1 unit
Supply	made_to_order
