JLG-43D Altimetry Radar

MD-P00725 · md-jlg-43d-altimetry-radar

The JLG-43 radar is a nodding height finding radar, a two-dimensional (2D) radar which only provides azimuth and height data and is normally paired with other air search radars which provides the range to complete the picture. It is a fully mobile system which can be towed and is air transportable.
