Lightning Protection Design and Verification for UAV

MD-P00475 · md-lightning-protection-design-and-verification-for-uav

Lightning is a common natural phenomenon, with an average of about 8 million lightning strikes occurring every day in the Earth's atmosphere. Among them, the amplitude is as high as 200 kA, and the current rise rate can reach up to about 1000 kA per second. UAVs flying at high altitudes are very vul

TECHNICAL SPECIFICATIONS

Parameter data is maintained in the catalogue record. Contact us for the full parameter table.

CERTIFICATION

Certification status is confirmed per order and is not published in the catalogue listing. Request the current declaration, test reports or conformity certificates from our sourcing team.

ORDERING INFORMATION

Model	Lightning Protection Design and Verification for UAV
Part number	MD-P00475
Lead time	30 days
Minimum order	1 unit
Supply	made_to_order

Generated from the UAVSale product catalogue. Figures are manufacturer-supplied and subject to configuration. For the current revision and full documentation set, contact our sourcing team.
